

Project Finance Analyst

Washington, DC - Full time

New Columbia Solar (NCS), the leading solar energy company in Washington, DC, is seeking to hire a Project Finance Analyst.

Description

NCS is seeking a Project Finance Analyst who will play a central role in implementing the company's project and corporate financing strategies. This individual will be responsible for conducting investor and lender due diligence, building and managing project finance models, communicating with investors and lenders, and providing financial support to the Business Development team to screen and underwrite new projects. The Project Finance Analyst will work closely with our Senior Finance Manager to devise and implement financing strategies at the corporate and project level to optimize the growth of our business.

Applicants should have a demonstrated entrepreneurial passion for renewable energy and project finance, with multiple years of experience in renewable energy finance (or a related field) preferred. The Project Finance Analyst will be expected to have strong analytical skills, an appreciation for the financial and technical complexities of solar energy finance, and the desire to operate as an important contributor within a fun, fast-paced, and early-stage renewable energy company.

Job Duties

- Work closely and collaboratively with the Management Team and other senior leaders to determine and execute on project financing strategies
- Lead due diligence for multiple stakeholder relationships, including project lenders, equity investors, and M&A partners

- Provide support to the Sales/Business Development team to establish financial underwriting metrics and screen new project development opportunities
- Generate and manage financial models at the corporate and project level
- Work with Senior Manager of Finance to negotiate, execute, and deploy financing facilities
- Contribute to the development and implementation of NCS's corporate and project financing strategies

Minimum Qualifications

- Proficiency in Microsoft Excel and Powerpoint – applicants should not only be great at Excel, but also have experience building and managing complex modeling, building reports, and creating attractive presentation materials
- Ready to work in a fast-paced, early-stage, startup environment
- A thirst for knowledge - you love rolling up your sleeves and getting involved in projects across all areas of a business
- Bachelor's degree in business, economics, finance or accounting
- 2+ years of relevant experience
- Skilled at defining problems, collecting data, establishing the facts, and drawing valid conclusions
- Highly organized, independent, and self-motivated; commitment to delivering consistently accurate and high-quality work product
